

RaeAnn Grossman

Non-Executive Chairman

Executive Vice President, Operations - Risk Adjustment,
Population Health Management and Quality

As Executive Vice President of Operations for Risk Adjustment, Population Health Management, and Quality, RaeAnn is responsible for leadership and management oversight of financial performance and operations, as well as innovation, vision, strategic and business planning. In this capacity, she is reframing and accelerating the success and impact of Cotiviti's industry-leading Risk Adjustment and Quality, and Analytic solutions focused on health plan success, member health and provider performance. With her extensive track record of customer focus, value creation, along with government program and industry experience, Grossman drives the Cotiviti portfolio to optimize financial and clinical metrics, reduce inefficiency, and improve overall healthcare performance.

Grossman is a renowned industry expert in healthcare innovation and transformation, product strategy, partnership development, and risk adjustment and quality. She has more than 25 years of experience in executive roles at an array of organizations, including commercial and government health plans as well as medical groups, integrated hospital systems, startups, and physician hospital organizations. Most recently, she was President of Medicare Advantage/COO of Bright Health Plan, managing a multi-state Medicare Advantage plan. Prior to that she held C-suite roles at various healthcare technology and consulting firms for nearly two decades, including extensive time with Gorman Health Group, which the premier consulting firm for government-sponsored healthcare programs.

RaeAnn earned an MS in urban and regional planning from Florida State University, and a bachelor's degree in environmental policy from University of Minnesota.
