MedAdvisor Solutions™

# Release Notes

August 2025

Overview:

Over the month of August, updates to MedAdvisor for Pharmacy focused on simplifying key processes, improving efficiency and streamlining everyday workflows.

What's New:

Save Draft Without Leaving Form

- The drafts of service forms can now be saved without closing the form.
- After saving, the form will remain open, allowing users to continue entering information seamlessly.
- This would enable more frequent saving, reducing the risk of lost work and improving workflow efficiency.
- If you prefer to save and close the form, this can be done via the three dots menu with 'Save and Close'.

Patient Consult

- The clinical notes field has been increased to allow up to 5000 characters to support detailed notes.
- When Patient Consult is used for adverse event management, instructional text will be displayed regarding the reporting of human safety information.

Please contact our Customer Support Team at support@medadvisorsolutions.com if you have feedback or are experiencing any product challenges.

Updated 29th August 2025.

MedAdvisor Solutions™

Immunisations

- COVID-19 vaccines, no longer on the market, have been removed from the vaccine list.
- Vaxchora, for Cholera, is now available for recording and submission to AIR.
- The infectious disease DT has been added with vaccine ADT booster for recording and submission to AIR.
- Prevenar 20 has NIP funding from 1 September 2025. This vaccine can be submitted to PPA under NIPVIP.

You may have missed:

Ready to Collect Quick Action Button

- A Ready to Collect quick action Button has been added to medication orders in the MedAdvisor for Pharmacy Inbox (excludes pay in advance orders).
- Reduces steps required from pharmacists to fulfil medication orders.

Improved SMS Replies Appearance

- User interface of the MedAdvisor for Pharmacy Inbox has been updated to display SMS reply content from patients more clearly.
- This includes improvements to how it is displayed if multiple messages are received from the same patient.

MedAdvisor for Pharmacy Anytime, Anywhere Access

- You can now access MedAdvisor for Pharmacy anywhere, anytime using your preferred device (e.g. laptop)

Access our MedAdvisor for Pharmacy web access resources for more information [here.](#)
