MedAdvisor Solutions™

Release Notes
October 2025

What's New:

Immunisation Forms – Antenatal Reporting Changes
- Effective by end of October 2025.
- Pregnancy Question Added: "Is the patient pregnant?" must be completed for females aged 10–65; pre-populated from pre-screening or subsidised checklist.
- Vaccine Funding Type Field: Antenatal values removed.
- Action: Complete the pregnancy question for all patients matching criteria. Continue using Vaccine Funding Type until update is received.

BEFORE

AFTER

Patients Screen Shortcut
- Instantly open the Patients search screen from anywhere on your computer using a new global Windows shortcut—making patient lookups faster than ever.
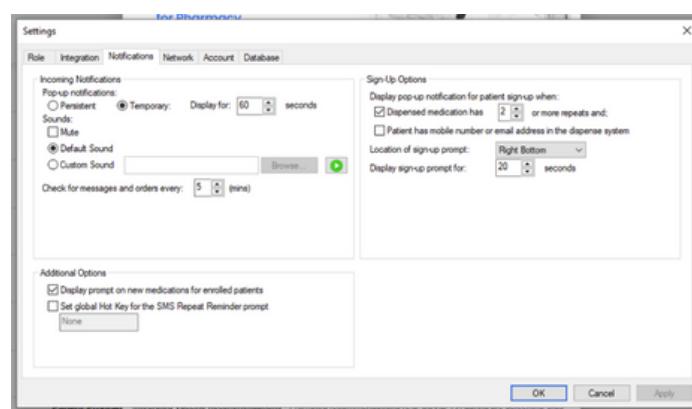

This option is available from MedAdvisor settings accessed from the icon in your windows system tray (near the clock)*

Please contact our Customer Support Team at support@medadvisorsolutions.com if you have feedback or are experiencing any product challenges.

Updated 23rd October 2025.

MedAdvisor Solutions™

What's New:
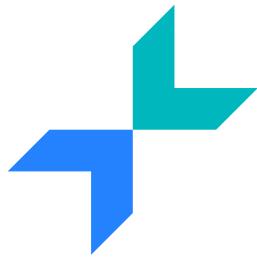

Administration of Injection and Vaccination Form Updates
- Administration of Injection: "mL" added as a dosage unit.
- Administration of Injection: Free text limit increased to 2,000 characters.
- Shortened COVID-19 Pre-Screening Form: PDF version reduced to 2 pages for easier printing.
- XBB vaccines removed from COVID-19 form as they are no longer available.
- H-B-Vax II (Dialysis) added to Immunisation Form with AIR code.

You may have missed:

Save Draft Without Leaving Form
- The drafts of service forms can now be saved without closing the form.
- After saving, the form will remain open, allowing users to continue entering information seamlessly.
- This would enable more frequent saving, reducing the risk of lost work and improving workflow efficiency.
- If you prefer to save and close the form, this can be done via the three dots menu with 'Save and Close'.

Improved SMS Replies Appearance
- User interface of the MedAdvisor for Pharmacy Inbox has been updated to display SMS reply content from patients more clearly.
- This includes improvements to how it is displayed if multiple messages are received from the same patient.

MedAdvisor for Pharmacy Anytime, Anywhere Access
- You can now access MedAdvisor for Pharmacy anywhere, anytime using your preferred device (e.g. laptop)

Access our MedAdvisor for Pharmacy web access resources for more information [here.](#)
