

Release Notes

July 2026

What's New:

Pay in Advance (PIA) Report Enhancement

- Individual orders in PIA reports now display the dollar value against each patient
- Makes reconciliation easier for orders covering multiple patients

Pharmacist Consultation

- A new clinical service type has been added to the Pharmacist Consultation form for cases where diagnosis falls outside scope authority and requires referral
- Enables more accurate recording of clinical service type

Clinical Service Type

Outside scope authority (please specify)

Updated Consent Label in Patient Consult Form

- The consent label now references both clinical and financial consent, in addition to existing data collection consent
- Enables a more detailed record of patient consent

Patients / PENNY PATIENT

Patient Consult

Patient Consent *

Patient has provided informed clinical consent and financial consent (where applicable) and has consented to the collection of personal and health information related to this service.*

Updated 29th July 2026.

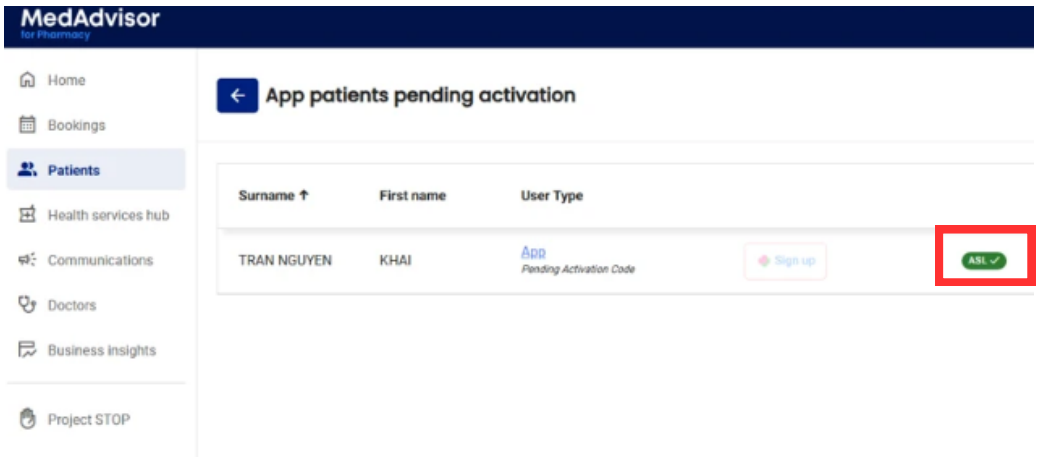

Medicare and Department of Veterans' Affairs (DVA) Numbers Added to Dose Administration Aid (DAA) Report

- Medicare number and DVA number are now included in the DAA report
- Helps users identify patients more easily

You may have missed:

ASL status now visible

- An App patient's ASL status is now directly visible, making it easier to identify whether they are connected and active.

Capvaxive Added to NIP

- From 1 July, Capvaxive is funded under the National Immunisation Program, replacing Prevenar 13 and Pneumovax 23 for pneumococcal vaccination.
- The immunisation form now supports submission of Capvaxive to AIR and PPA for NIPVIP claiming.

Please contact our Customer Support Team at support@medadvisor.com.au if you have feedback or are experiencing any product challenges.
