

## What's New:

### Mobile Number Discrepancy Alert

- Inbox notification triggered when a mismatch is detected between Dispense and SMS patient mobile numbers
- Helps pharmacists identify and update incorrect patient details in Medadvisor for Pharmacy
- Learn more [here](#)

### NSW Hormonal Contraception

- The form name has changed from "Oral Contraception" to "Hormonal Contraception NSW"
- The form supports the expanded contraceptive options now approved for resupply by trained NSW pharmacists

### Flu Prescreener Update (FluMist)

- Additional screening questions have been incorporated into the Flu prescreening checklist in the form
- These questions will be made available for patients to complete online in a future update
- Supports the introduction of FluMist

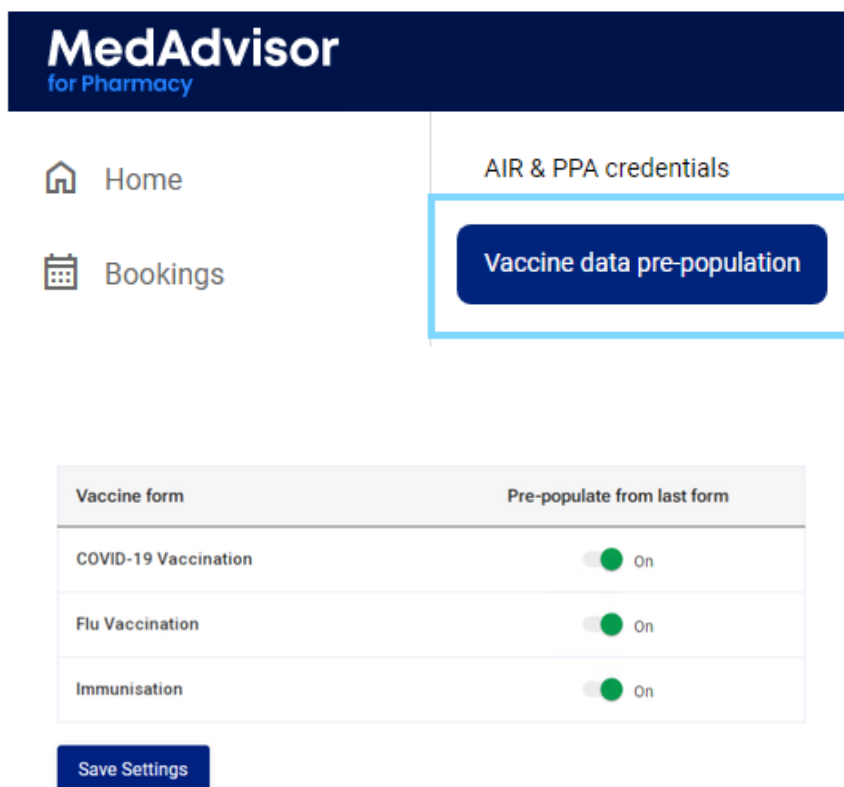

### Support for Detailed Clinical Note Taking

- Character limits for free text note fields have been increased across the UTI Form and Certificate for Leave
- Enables more detailed clinical documentation

# You may have missed:

## Vaccine Data Pre-Population Settings

- Immunisation forms automatically populate vaccine data from the previously completed form of the same type, reducing manual data entry and improving workflow efficiency.
- New settings introduced to allow stores to manage this functionality:
  - Navigate to Patients > Service Settings > Vaccine data pre-population settings
- All forms have pre-population turned on by default (aligned with existing behaviour)
- Pharmacies can choose to turn this feature off based on their preference
- Click [here](#) for more information

The screenshot shows the MedAdvisor interface. The top navigation bar includes 'Home' and 'Bookings'. The 'AIR & PPA credentials' section contains a button for 'Vaccine data pre-population', which is highlighted with a blue border. Below this is a table with the following settings:

Vaccine form	Pre-populate from last form
COVID-19 Vaccination	<input checked="" type="checkbox"/> On
Flu Vaccination	<input checked="" type="checkbox"/> On
Immunisation	<input checked="" type="checkbox"/> On

A 'Save Settings' button is located below the table.
