

Release Notes

June 2026

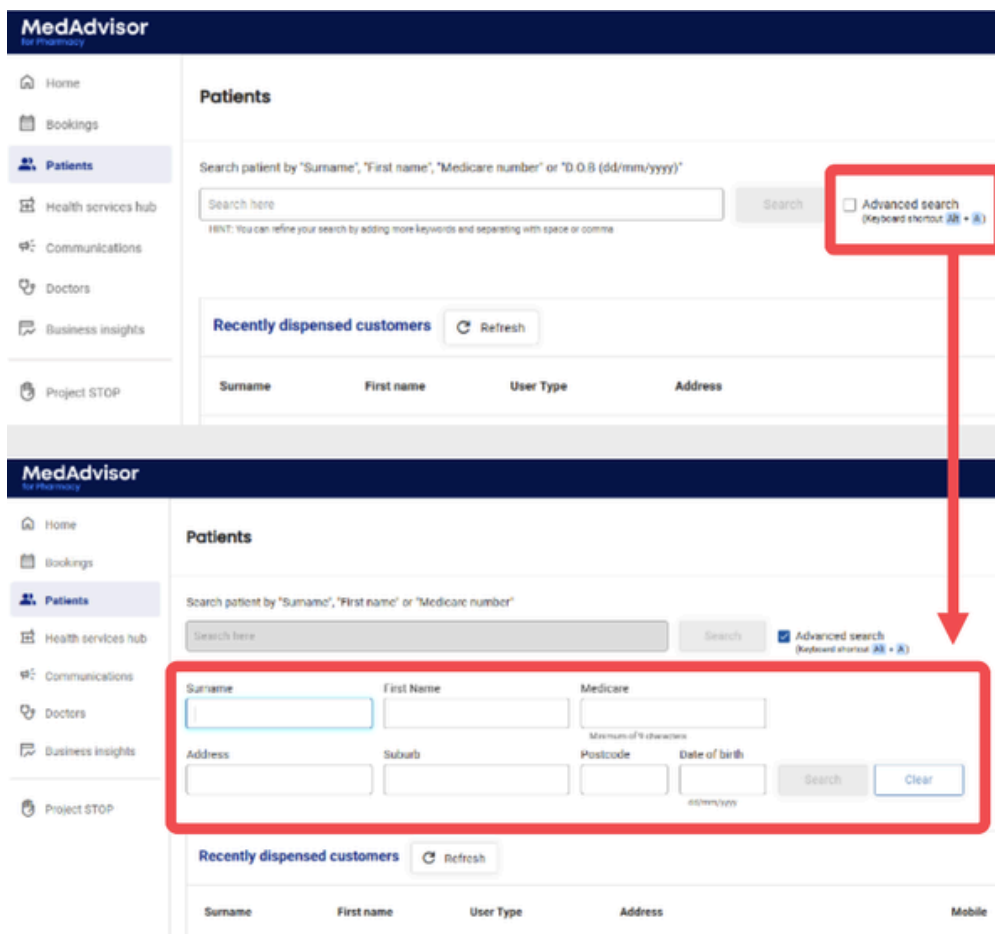

What's New:

Merge Patients Tool

- A dedicated tool is now available to help pharmacists merge duplicate patient records in Medadvisor for Pharmacy
- Ensures patient records remain accurate and up to date

Advanced Patient Search

- Patient search has been improved to make finding patients faster and more reliable
- Supports patients with spaces in their names (e.g. De Niro)
- Simplifies searching for patients with common surnames (e.g. John Smith)

MedAdvisor for Pharmacy

Patients

Search patient by "Surname", "First name", "Medicare number" or "D.O.B (dd/mm/yyyy)"

Search here Search ☐ Advanced search (Keyboard shortcut: **Alt** + **A**)

TIP: You can refine your search by adding more keywords and separating with space or comma.

Updated 29th June 2026.

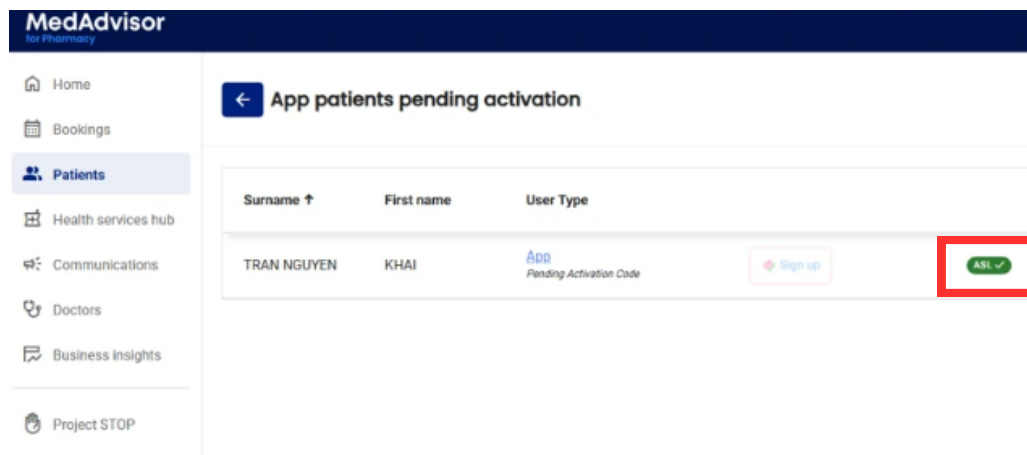

Check SMS Reminders

- A centralised view to easily manage which medications a patient is receiving SMS reminders for
- Pharmacists can untick individual medications from SMS reminders as needed (e.g. if a patient is no longer taking certain medications)

ASL status now visible

- An App patient's ASL status is now directly visible, making it easier to identify whether they are connected and active.

Capvaxive Added to NIP

- From 1 July, Capvaxive is funded under the National Immunisation Program, replacing Prevenar 13 and Pneumovax 23 for pneumococcal vaccination.
- The immunisation form now supports submission of Capvaxive to AIR and PPA for NIPVIP claiming.

Please contact our Customer Support Team at support@medadvisor.com.au if you have feedback or are experiencing any product challenges.
